

PHILIPS iSite PACS upgrade – January 2016

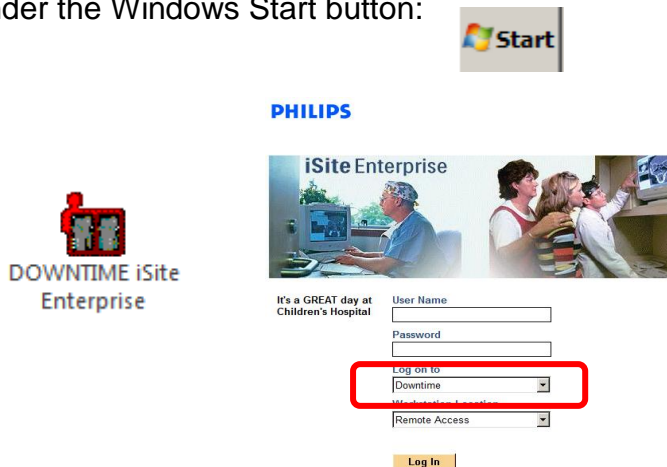

From Friday, Jan. 29 at 2300 to approximately Saturday, Jan. 30 at 1500, the PACS system will not be available to users in the manner they are accustomed, due to an upgrade that will be taking place.

Staff currently access iSite PACS via the PACS Image link in Epic or through the green icons on the desk top or in the Citrix environment:

DURING THE UPGRADE

While the Philips PACS is being upgraded, users will need to access images via the Philips down time server using the **RED DOWNTIME** iSite Enterprise icon via Citrix, on their desktop or from “All Programs” under the Windows Start button:

PACS will also still be available through the **EPIC PACS Images link**.

AFTER THE UPGRADE

The Philips PACS name will change from *iSite* to *IntelliSpace* but the icon will remain the same.
